

The Case of Bangla N-V conjunct verbs

Presentation by:

Mona Sinha Mahapatra

- Mohanan (2006) specifies that any undertaking of complex predicates should look at some theoretical questions irrespective of the framework.
- Questions regarding the host and light verb forming a single syntactic unit are considered. The host and light verb are tested along the lines of it belonging to the lexical or phrasal category.
- Finally, the resulting constituent of the host and the light verb form either a lexical category or a phrasal category.
- In terms of case marking and agreement, it is important to note how the light verb and the host contribute. These points pertaining to agreement and case are also instrumental in terms of enquiring about the input of the syntactic head in these constructions.

About Bangla

- Bangla is an Indo-Aryan language spoken mainly in the eastern part of India as well as Bangladesh. Bangla serves as an official state language of West Bengal and Tripura, also spoken in some parts of Assam and serves as the national language of Bangladesh.
- Bangla or Bengali has two forms: ‘sadhu bhasha’ or ‘cholito bhasha’.
- Bangla has an SOV word-order.
- Bangla allows Pro-drop like some other eastern Indo-Aryan languages.
- Bangla shows Nominative-Accusative case system.
- Nouns are inflected for case which includes nominative, accusative, dative, genitive, instrumental, ablative, and locative. The case marking pattern for nouns depends on the noun’s degree of animacy. For inanimate objects, for example, the accusative case is unmarked.
- Bangla verbs are highly inflected and are generally regular with a few exceptions. They consist of a stem and an ending - traditionally noted in their “verbal noun” form (typically formed by adding -a to the stem).

Predicative noun as an object of light verb [kora]

- Topicalization

1.a. punya anu ke prem kore.

Punya-Nom Anu Acc love-N do-Prst

Punya loves Anu.

b. prem punya anu ke kore.

love-N punya-Nom anu Acc do-Prst

Punya loves Anu.

c. ira akasher khoj korche.

ira-Nom akash-Gen search-N do-Prst-imperf

Ira is looking for Akash.

d. akasher khoj ira korche.

Akash-Gen search-N Ira-Nom do-Prst-imperf

Ira is looking for Akash

- Gapping

2. a. monidipa ke or ma o ador kore aar baba o __ kore.

Monideepa Acc pron-3P mother EMP adore-N do-Prst CONJ father EMP do-Prst

Monideepa's mother also adores her and so does her father.

b. shudhu tomra pujo korbe aajke baki-ra kal __ korbe.

only you-Pl-Cl puja-N do-Fut today everyone else-Cl tomorrow do-Fut

Only you all will pray today, others will do it tomorrow.

- Passivization

3. a. amita pujo korbe.

Amita-Nom pujo-N do-Fut

Amita will do puja

b. pujo kora hobe amita-r dara
puja-N do-VN be-Fut amita-Gen by
puja will be done by Amita.

- PRD+ noun as the object

4.a. noyonika jogonnather pujo korbe aajke.
Nayanika-Nom jagannath-Gen puja do-Fut today
Nayanika will pray to God Jagannath.

b. noyonika ki korbe aajke?
Nayanika-Nom what-Q do-Fut today
What will Nayanika do today?
Response: jogonnather pujo/ pujo
Jagannath-Gen puja/ puja
Jagannath's Puja/ puja

- Coordination

5. ei poribare sobai eke onno ke prem aar ador kore.

this-dem family-Loc everyone one-another Acc love Conj adore do-Prst

In this family, everyone loves and adores each other.

Theoretical Background

- Grimshaw and Mester (1988) provide an analysis of the Japanese verb [suru] meaning ‘to do’. [suru] is considered to be completely or partially devoid of its own θ -marking capacities.
- a. Input: keikoku meaning ‘warn’ (agent, goal, theme) + suru () <Acc>
b. Output: keikoku (Theme) + suru (Agent, Goal)
- While the light verb does not assign the semantic roles, it absorbs the \backslash -grid of the predicative noun. Thus, the arguments brought in by the predicative noun occur in the complement positions of the light verb.
- Thus, the process of ‘argument transfer’ and its rules are specified as such:

- i) “At least one argument apart from the subject must be outside the NP (i.e., must have been transferred).
- ii) The subject argument must always be outside the NP.
- iii) For Nouns that take a Theme and a Goal, if the Theme argument is realized outside NP, the Goal must also be realized outside NP.” Grimshaw and Mester, 1988: 215)
- Argument transfer may include either complete or partial transfer. This appears to be the case for Bangla as well.
- Complete Transfer:
 - i) [prem-kora]

prem ‘love’ (Agent, Patient/Theme)

kora ‘to do’ (Accusative)

prem + kora (Agent, Theme) <Nom, Acc>

- Partial Transfer:

i) [k^hoj-kora]

k^hoj ‘search’ (Agent, Patient/Theme) <Gen>

kora ‘to do’ (Accusative)

k^hoj (Patient/Theme) <Gen> + kora (Agent) <Nom>

- Choi and Wechsler (2001) propose an amalgamation of both and suggest that in Korean light verb constructions of the N-V type, the idea of argument transfer and mixed category are required to be able to accommodate the Korean LVCs of the N-V type.
- They posit two abstract lexical types following Malouf (1998) namely nominal and verbal.

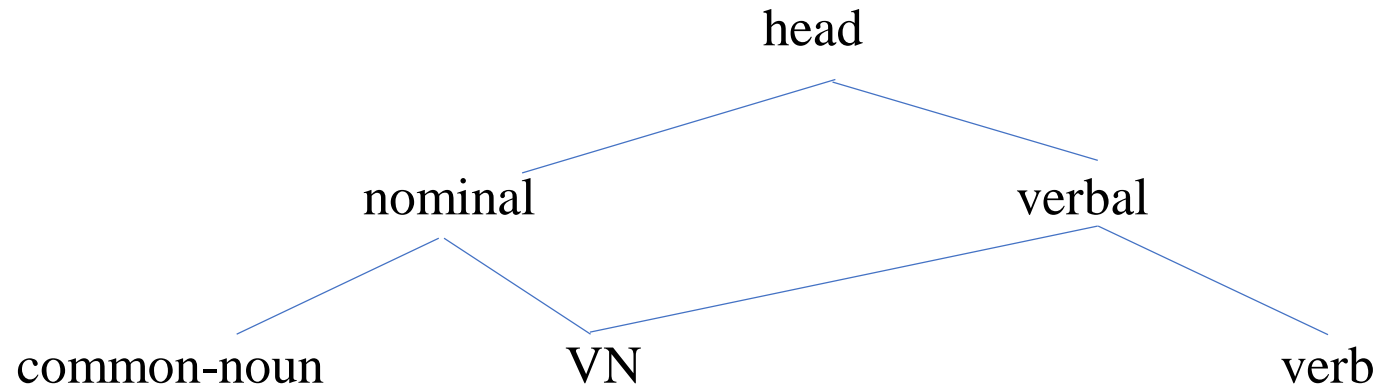

Fig.1

(Choi and Wechsler, 2001)

- Type declarations

nominal: receive case

verbal noun: assign V-case; modified by adverb

verb: don't receive case

common-noun: assign N-case; modified by adjective

- Resulting properties of the three maximal types:

	assigns	modified by	receives case?
common-noun:	N-case	Adj	yes
verb:	V-case	Adv	no
VN:	V-case	Adv	yes

6. a. angshuman judishTir ke akromon korbe.

angshuman-Nom judishtir Acc attack-N do-Fut-3P

Angshuman will attack Judishtir.

b. angshuman ke akromoner somoy...

angshuman Acc attack-Gen during

During Angshuman's attack..

c. angshuman-er opor akromon-er somoy...
angshuman-Gen on-PostP attack-Gen during
during the attack on Angshuman...

7. a. jotin bonkim-er songe besh lomba torko korchilo.
Jotin-Nom Bankim-Gen with quite lengthy-Adj argument do-Pst-3P
Jotin had a lengthy argument with Bankim.

b. jotin bonkim-er songe jore-jore torko korchilo.
Jotin Bankim-Gen with loudly-redup argument do-Pst-3P
Jotin had an argument with Bankim loudly .

8.a. protim Tinku ke bishal sahajjo korechilo.

Protim-Nom Tinku Acc huge-Adj help-N do-Pst-perf

Protim had helped Tinku in a big way.

b. protim Tinku ke hoTatkorei sahajjo korechilo

Protim-Nom tinku Acc suddenly-Adv-EMP help-N do-Pst-perf

Protim had suddenly helped Tinku.

9.a. eto boRo sTar ke eto joldi dekha boRo bepar.

such big star Acc so quickly see-VN big deal.

Spotting such a huge star in such a short time is a big deal.

b. monjimar ankita ke dekha-r somoy...

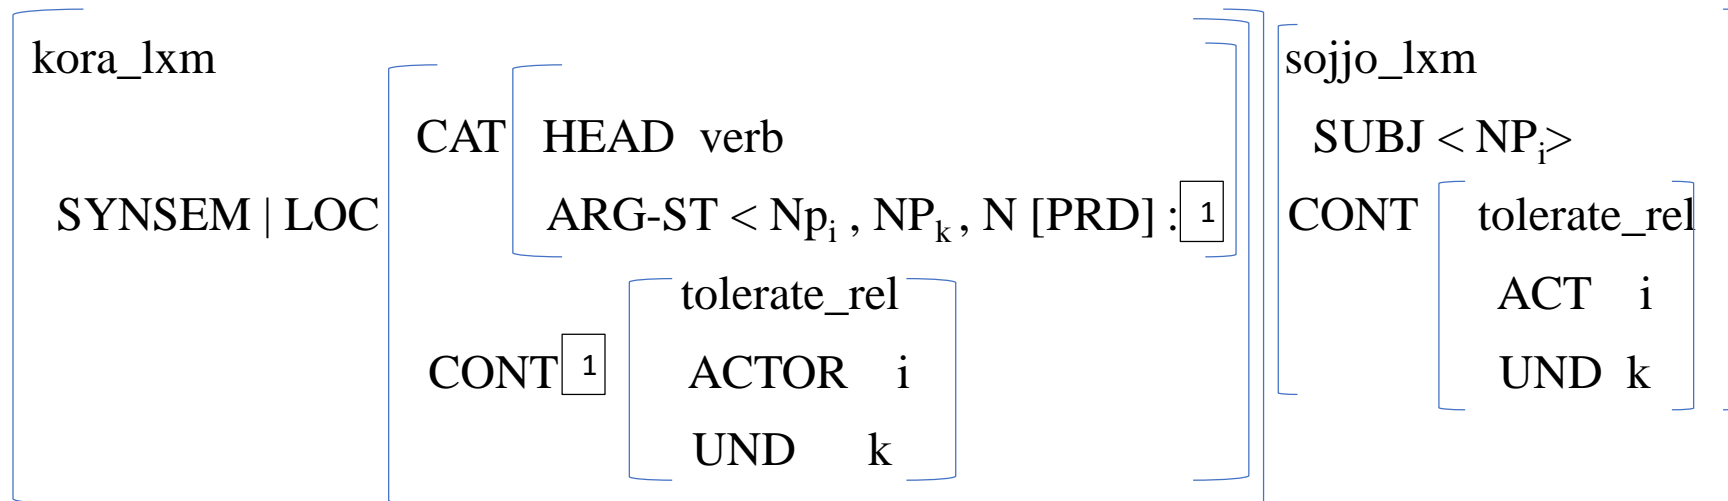

Manjima-Gen Ankita Acc see-Gen during/while

While Manjima saw Ankita...

- [kora] meaning ‘to do’ generally combines with a predicative noun that takes an ACTOR proto-role. The following sentences show the same.

10.a. Amit oder baaje bebohar protibar sojjo kore.
 Amit-Nom their bad behaviour everytime tolerate-N do-Prst
 Amit tolerates their bad behaviour everytime.

b. Amit-er oder baaje bebohar sojjo hoche na.
 Amit-Gen their bad behaviour tolerate-N be-Prst-Imperf Neg
 Amit is unable to tolerate their bad behaviour.

11. a. pinki-r onko shekha-r ichche korche.

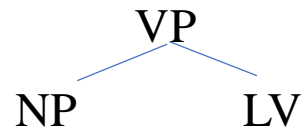

Pinky-Gen math learn-VN desire-N do-Prst-imperf

Pinky wants to learn (to solve) Maths.

b. pinaki-r sob jinish-er theke bhoite kore.

Pinaki-Gen every thing-Gen from-PostP fear-N do-Prst

Pinaki fears everything.

- Some frames of the predicative noun and light verb

12.a. bimal sujata ke sahajjo korbe.

Bimal-Nom Sujata Acc help-N do-Fut

Bimal will help Sujata.

12.b. Bimal sujatar songe prem kore.
 Bimal-Nom Sujata-Gen with-PostP love-N do-Prst
 Bimala is in love with Sujata.

12.c. pinki papiyar opor bhorsha kore.

Pinky-Nom Papiya-Gen Post-P reliance-N do-Prst

Pinky relies on Papiya.

- Predicative nouns like [prem] meaning ‘love’ take the postposition with the P FORM [songe] meaning ‘with’ or the accusative case marked argument, and predicative nouns like [bhorsha] meaning ‘reliance’ take a postposition meaning ‘opor’ on which brings the argument.
- Das (2021) proposes that the Bangla case mechanism can be broadly categorised into two: morphological, where cases are shown by overt or covert case morphemes attached to NPs (e.g., Nom, Acc, Dat, Gen, Loc), or realised through postpositions. Das (1995:22 ; 2021) note that barring a few exceptions, Bangla postpositions govern their NP complements mainly in the Genitive case.
- The default case in Bangla is the genitive case. The genitive case is crucial while considering the pattern of nominal inflections. The non-structural cases which includes the instrumental, locative and ablative are realised through the genitive case marker within the PP.
- While English is noted to take one particular case in their NPs. Bangla while having its default case as genitive case, has some exceptions like the instrumental case ‘with’ - [die], which always takes an NP with the accusative case and not with the genitive case.

- While non-nominative subjects are not uncommon in many Indian languages including Bangla but the following clarifies a need for distinction between genitive constructions and pseudo-genitive constructions as observed below:

i) hum-ko piyas lagi (Hindi)

1-S-Dat thirst-Nom attach-Pst-3P

I feel thirsty.

ii) mote soso laguchi (Oriya)

1-S-Dat thirst-Nom attach-Prst-perf-3P

I feel thirsty.

iii) amar teshTa peyeche. (Bangla)

1-S-Gen thirst-Cl get-Prst-perf-3P

I feel thirsty

(Das, 2021: 237)

- Monjima Ankita ke Taka die sahajjo korbe.

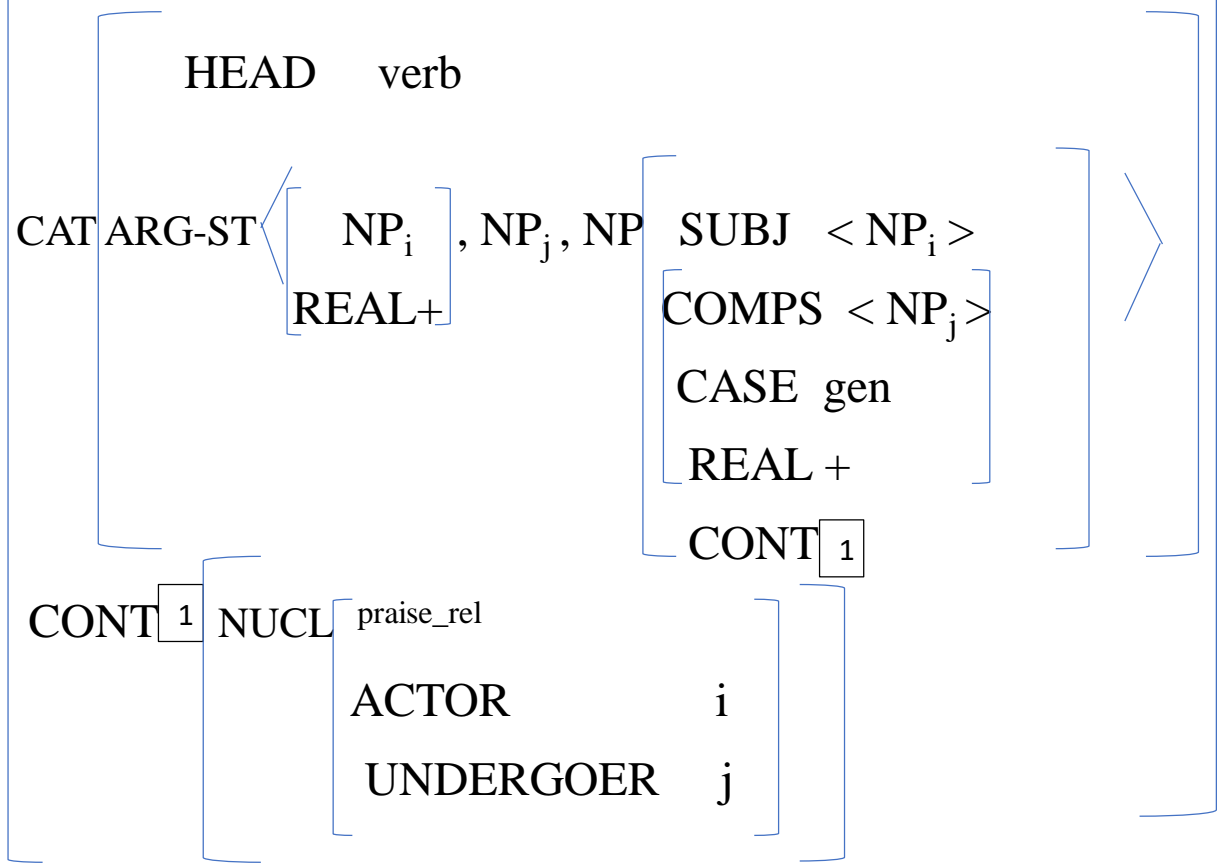

Monjima-Nom Ankita Dat money-N with-postP help-N do-Fut

Manjima will help Ankita with money.

12.d. noyonika sobar proshongsha kore.
 Nayanika-Nom everyone-Gen praise-Gen do-Prst

Nayanika praises everyone.

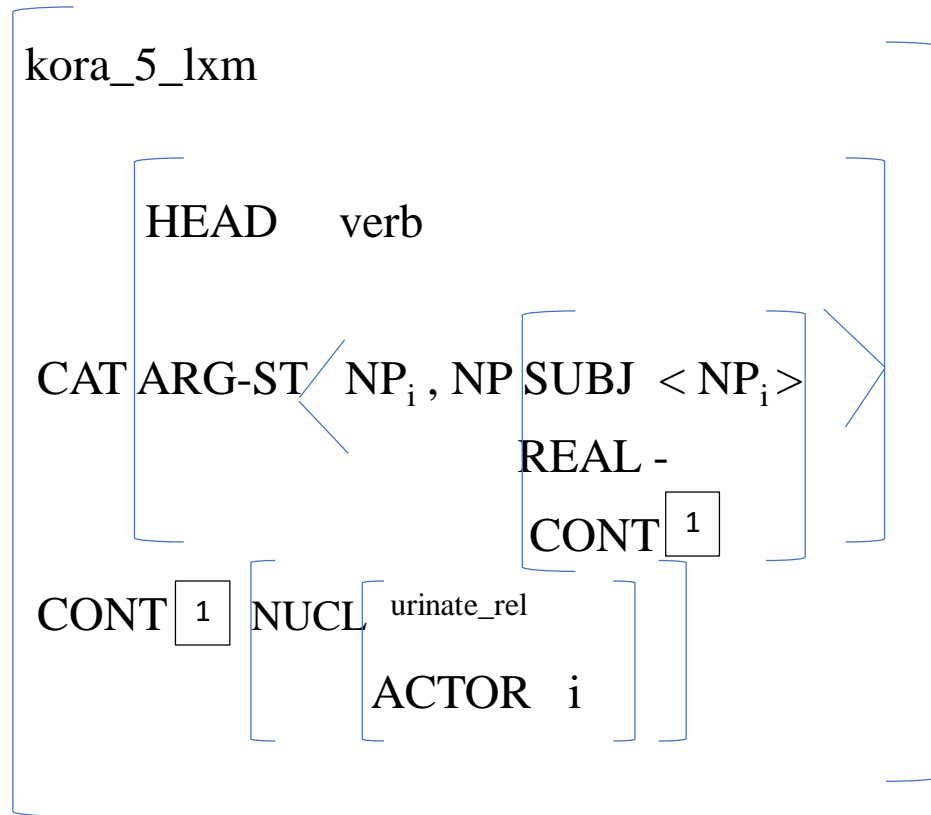

kora_4_lxm

- 12.e. bachchaTa paechap korche.

child-Cl urine-N do-Prst

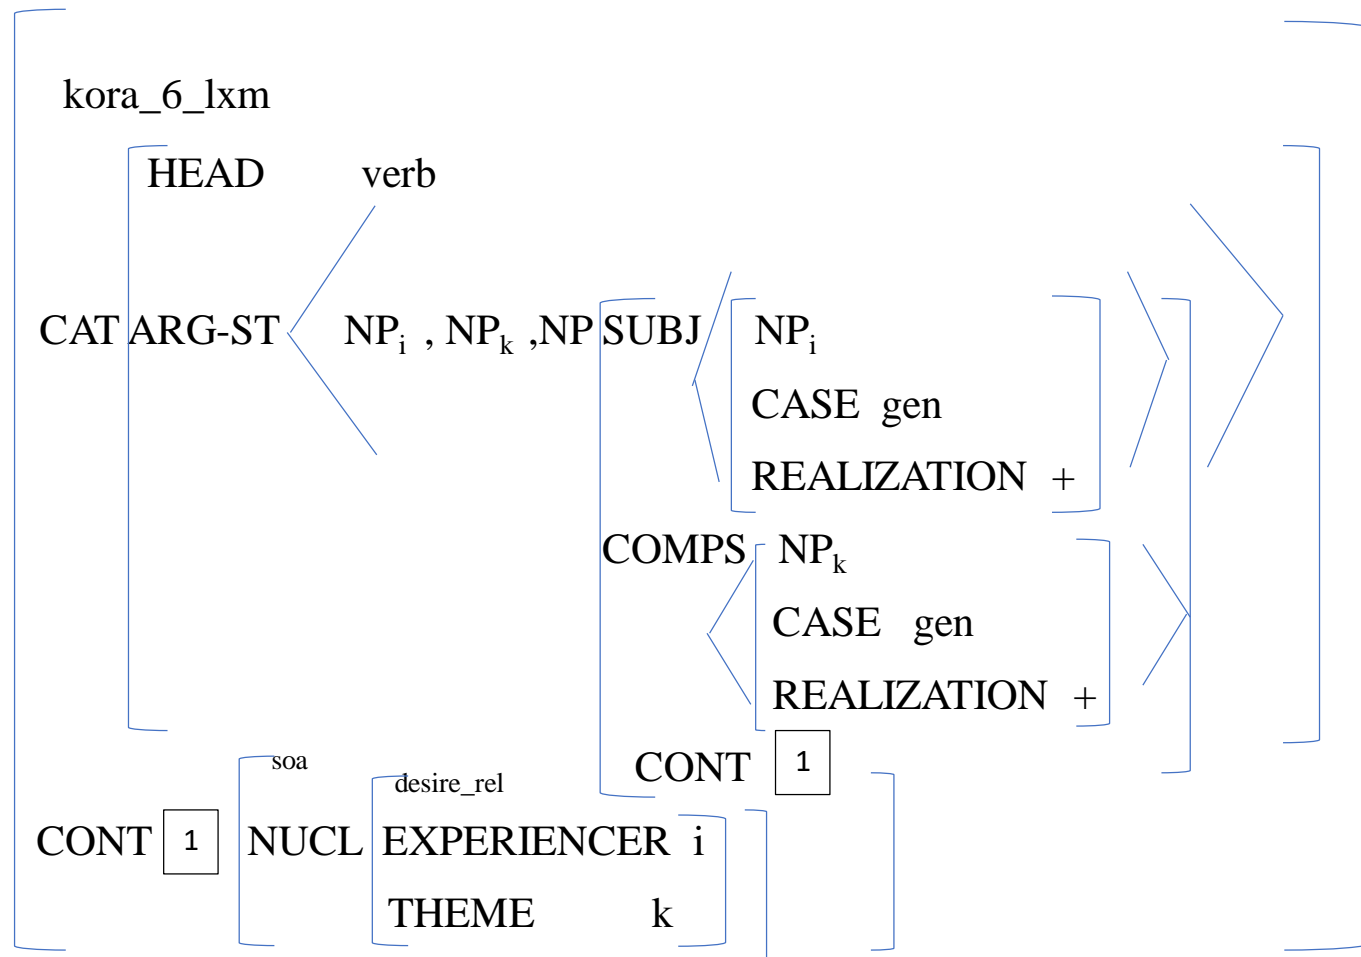

The child is urinating.

12.f. pinki-r onko shekha-r ichche korche.

Pinky-Gen math learning-VN desire-N do-Prst-imperf

Pinky wants to learn (to solve) Maths.

Conclusion

- Argument Transfer + Verbal nouns
- Interesting points of difference considering various N-V frames
- Experiencer subjects
- Genitive case as the default case in Bangla
- Predicative noun as syntactic object of [kora]
- [kora] meaning ‘to do’ shows influence over the Subject chosen (generally selecting the ACTOR proto role)
